

Safety Contract Building Trades Class

**Regarding the correct and safe use of hand tools,
power tools and related equipment used
in the home building process.**

Since I will receive classroom instruction on safe and proper use of the various hand and power woodworking tools via; verbal instruction, video, and demonstrations:

I intend to use the tools and equipment as instructed and explained in the class.

I intend to use the tools and machines as they are designed and intended to be used.

I fully expect to use the power cutting machines in such a way as to avoid having an accident.

I assume personal responsibility while running a machine.

I will not use a machine when I do not feel confident in its operation.

I will not hesitate to call the attention of the instructor to any misuse of the machines, or to request information and instruction on points that are not clear to me as to the proper use of the equipment.

Machines are to be used only on assigned projects when the instructor is present with the class.

I will stay out of the machine work zones when I am not using them.

I will not use a machine unless I have been given instructions and permission to operate it by the instructor.

I will report any injury, however slight, to the instructor.

I will agree to wear eye protection during all work times in the class.

*The Cedar Rapids Schools have a fine safety record in our Building Trades class; we intend to keep it as such.
This form is used as an aid in establishing a moral obligation toward safety by the student.*

Notice to Parents: Above is the safety contract which your son or daughter is expected to agree to, before he or she may use any hand or power tools in the Building Trades class. If you understand the conditions your son or daughter has agreed to, will you please sign below. Thank you for your prompt attention to this. Please return to David Smith, Instructor.
