

## General Safety Rules For Ladder Use

1. Do not substitute anything in place of a ladder.
2. Inspect ladders for defects before using them.
3. When going up, down or working on a ladder, always face the ladder.
4. Use at least one hand when going up or down a ladder.
5. Avoid reaching too high or too far to the side, keep your body centered.
6. Make sure that stepladders are fully opened and locked.

7. Place the feet of an extension ladder on even ground and away from the wall one foot for each four feet of height.
8. An extension ladder should extend above the edge of the roof at least three feet.
9. Never rest a ladder against a door or a window.
10. If you must place a ladder in front of a door, lock or secure the door.
